

Live On-Line Roster Services

The ASBRT is pleased to provide live on-line rosters at www.asbrt.alabama.gov. This means that any change to a license name, number, or status is reflected in real time. The days of having to wait for up to 24-48 hours for updates being posted through the typical process for the State are long gone. The moment the ASBRT office enters information into our database that affects the name, number, issue/expiration dates, disciplinary action, or license status the on-line roster will show this information immediately. This real-time service also applies to the student roster and will reflect any change in name, program, employing institution, or graduation date (just make sure you click on "Student" at the top for the Student Roster search to appear).

With these services, cyber-security features are required by the State of Alabama. Therefore, you will be asked to confirm you are not a robot from your screen when conducting a search. A License Roster search can be done by license number, last name, or first name. A Student Roster search can be done by last name, first name, or graduation date. You do not have to enter all of this information to conduct a search. For example, a search can be done by only the license number, only the last name, or if you are unsure of the spelling of a last name simply enter the first letter and all of the students or licensees under that initial will appear.

The on-line renewal application will open in June and completed on-line renewals will also be reflected in real-time on the license roster. In addition to our licensees, we hope employers will utilize these roster services to confirm license renewal status in the upcoming renewal season.

Both the license and student roster are available at www.asbrt.alabama.gov or directly at the following link:
